

It is our mission at Independence Court of Quakertown to ensure the quality of life of our residents is renewed and improved.

"I have never seen a more compassionate, caring group in one building. I can close my eyes at night knowing my mom is safe and cared for."

– Beverly M.

LIVE WELL WITH US

At Independence Court, you will discover a peace of mind when you experience our community. From spacious apartments to our amenities and personal care services, our experienced and well-trained staff is committed to supporting our seniors independence and well-being.

STAY WELL WITH US

We believe overall wellness is important at every stage of life. At Independence Court we start with an initial health assessment and continue assessments regularly thereafter. We cover items of activities of daily life (ADL's) such as:

- Bathing and Dressing
- Hygiene and cleanliness
- Contenance
- Medication management
- Dietary restrictions/nutritional management

After each assessment, a tailored care plan is designed, along with any physicians orders, and a meeting is held with the resident and family.

MAKE YOURSELF AT HOME

Each room is furnished with a bed, night stand, chest of drawers and chair, we encourage residents to bring items from home to personalize their apartments. Additional room amenities include: emergency call systems, a full bath, ample closet space, and individual climate controls.

BE WELL WITH US

We believe staying active is key to an overall well-being. Independence Court offers an array of daily activities and local community outings that help keep our seniors mentally and physically engaged. Our Activity Directors meet with residents regularly to find common interests and offer the right activities to get each resident actively involved. We look for activities to be fun, but also promote social integration and physical health. We often find residents forming new friendships, sharing memories and making new ones.

If you or a loved one are considering senior living, we hope you'll contact us. Our caring professionals have been working to improve seniors' health and quality of life for over 30 years in your community.
